### WEB DEVELOPMENT PROJECTS

**Gibbon** | MongoDB, Express, React.js, Node.js with APIs | <https://github.com/DorisCCLin/Gibbon-app>

*An application that allows users to collect feedback and get result analytics by sending email surveys.*

- Used Google OAuth API for user login authentication.
- Allows users to purchase credits with Stripe API.
- Mass email surveys are sent through SendGrid API.

**AUXcord** | Ruby on Rails, SQL with APIs | <https://github.com/DorisCCLin/AUXcord>

*An application for music-lovers to keep track of concerts. It's a group project where I contributed to API Implementation and backend database architecture.*

- Used TicketMaster API for users to search concerts and locate them.
- Implemented Google Calendar API for users to add concerts to their Google Calendar events.
- Features Full CRUD
